## **DETAILED ACTION**

This communication is in response to the document dated 2/12/2004. Claims 1-35 are pending in the application. Claims 1, 11, 24, 28, and 32 are independent claims.

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-10, drawn to access augmentation or optimizing, classified in class 707, subclass 2.
  - II. Claims 11-35, drawn to privileged access, classified in class 707, subclass 9.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I-II are related as sub-combinations disclosed as usable together in a single combination. The sub-combinations are distinct from each other if they are shown to be separately usable. In the instant case, each of the respective inventions has a separate utility other than with the other invention. See MPEP § 806.05(d).

Art Unit: 2163

3. Because these inventions are distinct for the reasons given above and the search required for group I, is not required for the other group, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
6. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined, with or without traverse.
